SUMMARY

Aspiring AI Engineer and Computer Science Engineering student with a strong interest in Artificial Intelligence and Machine Learning. Passionate about AI model development, algorithm design, and solving real-world problems through academic projects and continuous self-learning. Familiar with Java and fundamental software development concepts. Eager to gain hands-on experience as an AI Engineer or AI Analyst and contribute to innovative, technology-driven projects while continuously enhancing technical and analytical skills.

Technical Skills

Programming Languages: Java, SQL

Web Development: HTML, CSS

Concepts: Object-Oriented Programming (OOPS), Data Structures, DBMS, SDLC Basics

Libraries/Frameworks : Spring Boot, Junit, JDBC, Bootstrap

Soft Skills: Leadership, Teamwork, Adaptability, Time Management, Patience.

Tools: GitHub, Visual Studio Code, IntelliJ IDEA.

Projects

AI Educational Chatbot | Spring Boot, OpenAI API, REST APIs

- Developed an AI-powered chatbot to assist students with campus-related queries, academic information, and exam preparation support.
- Integrated OpenAI API with a Spring Boot backend to generate intelligent, context-aware responses.
- Designed and implemented RESTful APIs to enable seamless communication between frontend and backend services.
- Enhanced user experience by providing real-time, accurate, and personalized responses.

College Event Management Portal | Java, Spring Boot, HTML, CSS, MySQL

- Developed a full-stack web application for managing college events, registrations, and participant feedback.
- Implemented secure admin functionalities to create, update, and manage event details through a centralized backend portal.
- Designed responsive user interfaces using HTML and CSS and integrated them with RESTful APIs built using Spring Boot.
- Stored and managed user information, event details, and feedback efficiently using MySQL database.

E-Commerce Backend Application | Java, Spring Boot, Spring Data JPA, MySQL

- Developed a secure and scalable e-commerce backend application using Java Spring Boot with a modular architecture.
- Implemented Spring Data JPA for efficient database operations on entities such as users, products, categories, and orders.
- Designed RESTful APIs to support core e-commerce functionalities, including product management and order processing.
- Optimized database interactions and ensured maintainability through clean code practices and layered architecture.

Education

Kalasalingam Academy of Research and Education

2022 – 2026

B.Tech - Computer Science and Engineering (Specialization in Artificial Intelligence & Machine learning) - CGPA – 7.44

AP State Intermediate Board

2022

Intermediate - MPC – 79.96%

Achievements And Certifications

IEEE Technically Co-sponsored International Conference

- Appreciation, held on 19th and 20th December 2024 at College of Engineering, Anna University, Chennai 25

Certificate completion of all the lessons in code chef

- DATABASE MANAGEMENT SYSTEMS 28 march 2024
- Design and Analysis of Algorithms 26th October 2024.

Innovate KARE 24hrs Hackathon

- Final Round Participant, 8th and 9th of march 2025.
