📍 Dharamaraja Koil Road Krishnagiri Tamil Nadu 📅 2004-08-14

Summary

Aspiring AI Engineer as Computer Science Engineering student with a strong interest in Artificial Intelligence & Machine Learning, Learning AI model development and algorithm design through academic projects and self-study.

Familiar with Java. Eager to gain hands-on experience as an AI Engineer Analyst and contribute to innovative projects while building real-world skills.

INTERNSHIPS

Python programming Intern, Vaultofcodes(online)

05/2024

▪ Project: Chat application

ACADEMIA

B.Tech in Computer Science and Engineering (Specialization in Artificial Intelligence), *Karunya Institute of Technology and Science, Coimbatore*
CGPA 6.11

2022 – 2026
Coimbatore

12TH, TN State Board
67.33%

2022

SSC, TN State Board
85%

2020

TECHNICAL SKILLS AND TECHNOLOGIES

Programming Languages

Java HTML, CSS, python

Concepts

DataStructures and Algorithms, Machine Learning

Algorithms

Tools & Frameworks

Scikit-Leam, Numpy, Pandas, Matplotlib.

PROJECTS

Automatic Birthday Wishes Using Python

- Developed a Python-based automation script for sending personalized birthday emails using SMTP.
- Integrated Excel automation for dynamic data handling, reducing manual effort by 30%.
- Enhanced workflow efficiency by automating repetitive tasks and improving accuracy.

Wealth Vista - Expense Tracker

- Built a full-stack expense tracker web app using Django, PostgreSQL, HTML, CSS, and JavaScript with user-friendly UI and responsive design.
- Implemented features like user authentication, categorized expense tracking, and SMART goal setting.

- Integrated Chart.js for visual analytics and ensured security with encrypted data storage, CSRF protection, and role-based access.
- Followed MVT architecture, performed end-to-end testing, and deployed the project on Vercel for real-time access.
